**Computer Systems**
The Kansas 4-H SpaceTech Computer Systems portion of the computer project is designed to allow 4-H members to explore how information is moved from one part of the computer to the other; how information is moved between two or more computer systems (networking); how information is stored; or how information is acted on (programming).

System-On-A-Chip (SOC) (Such as Raspberry Pi) or a Micro Controller (such as an Arduino or Ozobot) AND is a compact (less than 4” x 4” x4”) system, which can be programmed AND requires minimal assembly to operate (e.g. connecting power, display, and keyboard/mouse cables).

Chip systems may use/include GPIO bread boards or HATS (Hardware Attached on Top) the size of which is not included in the size of the chip system, however the total size of the chip system and GPIO devices may not exceed 24” x 24” x 24” including any display cases. Class 5594 has been added-Chip system-a small (4”x4”x4”) programmed physical device that accomplishes a specific task.

For more information on entering computer systems in the Fair or specific KSF requirements, please contact the Extension Office.
